EVERGREEN SEEDLINGS

In the growing of evergreen seedlings the importance of seed sources cannot be over emphasized. We spare no effort in securing seed that we know is true to type and collected only from the best of stocks. All native seed is collected by our own men. We have a particular section of sandy loam on which we grow our seedlings. This produces a far better root system than is usually found on seedlings.

Remember, when buying stock from us you are getting material propagated under vigorous climatic, and ideal soil conditions. Stock has to be hardy to thrive up here in northern Wisconsin. Our soil conditions produce a root system that we are just egotistical enough to believe can't be beat anywhere.

Our sixty-eight years of successful evergreen growing makes us especially fitted to supply the trade with an excellent grade of material at prices you can't afford to overlook.
